Art Unit: 2622

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Note MPEP 606.01.

- 2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
- 3. The drawings are objected to because Figure 9 should probably be labeled as "Prior Art" since it explains the operation of the prior art embodiment shown in Fig. 8.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/764,439 Page 3

Art Unit: 2622

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoneno.

The video signal processor of Yoneno (embodiments shown in Figs. 1, 12, 17 and 29) involves correcting the display of imagery by applying an adjusted clock signal to the image data. Looking at Fig. 1, a memory 4 uses a first clock signal (201) for writing in and a second clock signal for reading out the video data (Fig. 15). A delay unit 10 (detailed in Fig. 3) includes plural delay elements for delaying the second clock signal (for adjusting the reading out from memory 4). Selection of a clock from the delay elements that is optimally synchronized with a reference (h sync) signal, is made by CPU 8 in cooperation with main memory 12 (comprising associated elements 15 and 16), which outputs phase information of the selected optimum clock (e.g. col. 15 lines 10-14 and lines 28-36). An interpolation factor is determined based on the phase information and applied to the video data to correct the displayed imagery, the interpolation carried out by CPU 8, and based on the read-out (second) clock (col. 18 line 64 – col. 19 line 15), thereby meeting claims 1 and 5.

As for claim 2, the delay unit delays the second (read-out) clock by one period a multiple of times (noting Fig. 3), and a phase comparison is done by delaying what can be designated a "focus" clock, and a clock that is delayed one clock later (e.g. Fig. 6). CPU 8, with main

memory 12, both controls and selects the most suitable clock based on the phase comparison with an external sync signal (102). Subsequent interpolation is carried out, as noted above.

As for claims 3 and 4, the interpolation also involves the first clock since the first clock is used to determine the optimum delayed clock.

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348. The examiner can normally be reached on Monday Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

## Any response to this action should be mailed to:

Commissioner of Patents and Trademarks P.O. Box 1450 Alexandria, Virginia 22313-1450

## Or faxed to:

(571) 273-8300

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Customer Service Office whose telephone number is (703) 308-HELP.
